Our online SMS software has been designed to be easy-to-use and can operate from any web browser, meaning you can send SMS from any browser connected to the internet. Sending SMS from your computer involves just four steps: Log into your TextAnywhere account - You can sign up for free here Using TextOnline, write your message in the text box Enter the phone numbers you want to send to Press 'send' or schedule for a later time. Straightforward, direct and secure. See more on our SMS platform's features. Why TextAnywhere? Sending SMS messages online is easy, quick and low cost. We have two online applications, TextOnline and TextCampaign. With TextOnline you login to your secure, web-based account and send SMS messages online to contacts within your address books. You can organise your contacts in to groups, and, if required, make the groups available to other users of your TextAnywhere account. TextCampaign is also a web-based application, accessible through your online account. Rather than sending SMS text messages to groups of named contacts, you send SMS messages online to recipients stored in a simple spreadsheet. With TextCampaign you can also personalise your SMS messages online by having additional columns in your spreadsheet containing, for example, each recipients' first name. TextOnline and TextCampaign both enable, if you wish, recipients to be able to reply to your message, with replies most commonly being received as emails or stored online for your later access. With both online SMS message services you only pay for the messages that you send. There are no setup fees, ongoing charges, minimum contract terms, or minimum usage requirements. Just purchase additional packs of messages, as you need, securely online. In addition to online SMS message services, TextAnywhere also provides email-to-SMS services and a developer toolkit. With the developer toolkit you can integrate the sending of SMS in to your own application or web site, enabling you to send SMS automatically without having to go online to send your SMS messages. TextAnywhere has been providing SMS services to a wide variety of businesses and public sector organisations since 2003. Please do take a look at our applications to see if they meet your requirements to be able to send SMS messages online. You can open an account via our Free Trial page free of charge, and we'll give you 20 free messages to help you get started, using our online SMS message-sending applications. If you have any questions, please do not hesitate to contact us. Get in touch If you would like to discuss any of our send sms online services and their appropriateness to address your requirements, please do contact us on 08451 221 302 or send us an email at welcome@textanywhere.com. Do you want to integrate SMS into your marketing plan? Do you want to manage and control campaigns that send messages to hundreds or thousands of contacts on their mobile phones? Or do you want to automate the functionality of sending messages directly from your website, application or business software? By using an application to send SMS messages via the Internet within your communication and/or business tools and software, you will be able to create a close relationship with your audience via a simple text message. You can also personalise your message to each of your contacts (customers or prospects). With our Internet SMS Service ideal for professionals, find out how to multiply the potential of sending SMS over the Internet and take full advantage of the many opportunities to address your audience. Create your account for free and send text messages to your customers via our platform, which can be accessed by computer or smartphone. LEARN MORE Sending an SMS via the Internet means that you benefit from a reception and reading rate for your messages of around 95% (which is not comparable to email or a traditional telephone call). You can be sure that the SMS sent will be received and read by the majority of its recipients! This proven immediacy makes SMS a medium of immediacy and proximity, particularly suited to real-time communications. An SMS campaign sent via an SMS service thus creates direct and almost instantaneous relations with its contacts. A low-cost means of communication, sending SMS via the Internet costs up to 10 times less than a traditional campaign (flyer, poster, etc.). Benefit from the best quality/price ratio for your communications with the sending of SMS! Online SMS marketing services are mobile marketing solutions that are widely adopted by professionals and which perform far better than other marketing channels (emailing, internet display advertising, traditional advertising and display, etc.). They enable any business, regardless of size - from SMEs to global corporations - to benefit from an extremely simple, flexible and powerful online SMS campaign management tool. Whether you want to send mass messages or simply notify your customers of an appointment, our platform adapts to your needs. You can manage the programming on our website or with our various plugins, such as the Google calendar plugin. Back in 4 points on the benefits of SMS communication with smsmode© ! Manage your campaigns from our website or our SMS Gateway (HTTP API); managing your mobile and voice message campaigns is extremely simple via our online software accessible via a simple Internet connection. The sending and receiving of SMS messages can be fully configured and you thus have an application for sending SMS messages via the Internet with full functionality. A universal medium: sending SMS via the Internet means being sure that your text message will be delivered by all French or international telephone operators without any compatibility problems, and that it will be correctly read whether the end user has an Android, an iPhone, a smartphone or an old generation mobile phone. A guarantee of quality: an expert in sending SMS in France for nearly 15 years, smsmode is a historic SMS sending service in France. Recognised as an ARCEP Telecom Operator and connected as a direct operator route to mobile operators in metropolitan France and throughout the world (DOM-TOM and more than 166 countries), the use of its tools and services available online guarantee you maximum quality in the delivery of your messages. An offer without commitment: by opting for our SMS sending services, you benefit from a secure customer account with free registration and use (no fixed costs or subscription per month). Thus, you will only pay the rate for the SMS sent (by purchasing packs in advance). So open your smsmode account now to test our SMS solution! By choosing smsmode© as a provider for your SMS sendings, you benefit from a wide choice of products and professional services to send SMS by Internet at the best price while being simple and fast. GSM standard or higher, send your communications via SMS or instant messaging, mobile application... you can also send MMS, TTS, RCS... with no character limit and benefiting from a high quality network en route to direct operators and anywhere in the world. an SMS sending platform, easy to use, without subscription and accessible from a simple Internet browser and from your computer, which allows you to benefit from a professional tool for carrying out SMS marketing campaigns with advanced functions (management of contact lists and groups of contacts, drafting of message content, personalisation of the name of the SMS sender, programming and planning of SMS campaigns with a precise time and date of sending, mass sending of mass messages to an unlimited number of contacts, automatic blacklisting of erroneous telephone numbers and requests for STOP/unsubscription, etc.) Also accessible from your customer area are all the statistics on the receipt of SMS messages (acknowledgement of receipt available by SMS) or the receipt of SMS messages and the replies sent to you by the recipients of your messages. FIND OUT MORE ABOUT THE SMS OFFERS AVAILABLE The HTTP API and the Mail API which allow you to send SMS via the Internet directly from your website, your application, your business software or your e-mail. These interfaces are in the form of requests that can be easily integrated and implemented to allow you to trigger the function of sending SMS via the Internet as well as receiving responses to your sent SMS messages, and this in relation to the actions in your database. These SMS APIs have been designed to be as comprehensive as possible and as easy to use as possible. LEARN MORE ABOUT OUR APIS Our sales and customer support teams are at your disposal to answer all your questions about solutions to send SMS over the Internet and offer you the best price and degressive rates for your professional SMS campaigns to the France and the world. Feel free to contact our strong team with an experience of nearly 15 years as a provider of SMS solutions and mobile marketing and to benefit from advice and support for your SMS campaigns. Our goal is the success of your SMS Pro operation! CONTACT US By Danielle Gream i New message on 3d rendered cell phone image by Franc Podgor...jek from Fotolia.com Short Message Service (SMS) messages are more commonly known as text messages. Text messaging usually occurs between two cellphones, but SMS messages can also be sent via the Internet. Though there are paid services available online, free text messaging sites and personal email accounts allow you to send SMS messages to mobile phones free. Navigate to an online free text messaging site (see References). Enter the required information, such as your email address, country, recipient's phone carrier or subject line. Each free text provider requires slightly different information. Enter recipient's mobile phone number and message to be sent. Click the send option to send your SMS text message. Open your email account and create a new message. Enter the SMS address of the recipient in the "To" field. The SMS address will depend on the recipient's address and service provider. To determine the correct SMS address, visit the SMS address list link (see References). Type the message you wish to send and send as you would an email. The message will be delivered in text message form to the recipient's cellphone.
